Who are the Visioneers?

The Visioneers overarching vision and mission

has been and is to

create and celebrate a global community of leaders who are evolved worldcentric thinkers.

Leaders who are ready to collaborate

to find

creative solutions to the world's most complex problems,

to produce

a thriving, humancentric global civilization where:

- The economies of each nation serve all nations
- The Earth, the air, the water, ourselves, each other, and all living creatures are looked after
- Our differences are considered positive factors that reflect the wisdom and richness we bring to our common table as different parts of the same meal
- The common values of all nations include the respect, kindness, compassion, truth telling, justice, and following the rule of law that are the heritage of all our spiritual traditions

Dr. Geraldine Stewartz & Dr. Desmond Berghofer
Co-founders

The black shadow of our current world order crumbling into chaos requires
a new level of higher order thinking—now beginning to appear—

“You never change things by fighting the existing reality.

***To change something, build a new model
that makes the existing model obsolete.”***

Buckminster Fuller

That is what the Visioneers are doing—gathering leaders of mighty hearts and evolved minds, those whose talents are already demonstrated, to begin with the digital tools now available and ever advancing, allowing the best thinking to flow freely across every barrier and national border.

This community of leaders needs to include the elders to impart wisdom, adult thinkers of every kind, race, religion, profession, and leaders with the energy of youth whose main source of knowledge is no longer text in the classroom, but the very digital highway, continuously changing, that has become our global communication system available to all of us.

**Most important to understand in this emerging world order just ahead
is that the speed of change and discovery is meteoric.**

Just as the speed of flight changed the world order yesterday, so the instant digital connection changes the possibilities for today,

and what the world of tomorrow will look like will be dependent on the direction taken now.

Therefore, to achieve the vision of the world thriving in a Golden Peace **there is no time to lose.**

To increase the energy to create this new world order
**we need our most talented, evolved thinkers,
working as teams, not just to cooperate, but to collaborate,**
and most importantly to begin without delay
to build on the foundations already created.

That is what the Visioneers are doing.

To see what this looks like, take 15 minutes to watch the
Pax Humana video.

The Way Ahead

The Visioneers International Network has reached the point where we are ready to move on to create Visioneering Hubs around the world as local autonomous units focused on bringing transformational change to communities.

These hubs can be connected to a global centre that provides the opportunity for people to work together...

in Evolved Worldcentric Collaboration on a large enough scale to make a difference in education, in the environment, in politics, and for the enjoyment of the richness of each others' arts and culture, and for the benefits of science and discovery, and for the peaceful resolution of conflicts is the current and future work of the Visioneers International Network.

Call to Action

The Visioneers are issuing a call to action for all who will hear the call to step forward boldly and add their talent and energy to the thousands already working in this mode and become an unstoppable team of mighty hearted, evolved worldcentric thinkers and actors ready to collaborate in their own communities and on behalf of humanity.

If you are already a Visioneer tell us about yourself and what you would like to do to help. Send an email to tatiana@thevisioneers.ca

Award Winners

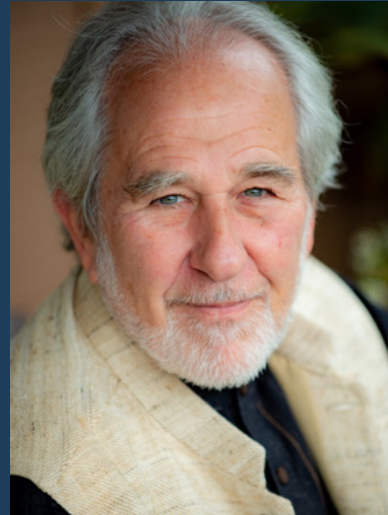

Featuring some of our prominent Heroes and Heroines of Humanity & Visionary Leader Award Winners

Dr. Jane Goodall

DBE, founder of the Jane Goodall Institute and UN Messenger of Peace, is a world-renowned ethologist and activist inspiring greater understanding and action on behalf of the natural world.

[See Profile](#)

Dr. Bruce Lipton

Internationally recognized leader in bridging science and spirit who is best known for the idea that genes are influenced by belief and DNA does not control biology. A stem cell biologist, bestselling author of *The Biology of Belief*, and recipient of the 2009 Goi Peace Award.

[See Profile](#)

Dr. Jean Houston

World-renowned scholar, philosopher, and co-founder of the Human Potential Movement, Dr. Jean Houston is a pioneer in the fields of human development, cross-cultural mythologies, and spiritual psychology.

[See Profile](#)

Laura K. Rose

Transformational educator, visionary strategist, and advocate for conscious leadership, Laura K. Rose guides individuals and organizations in evolving toward purpose-driven, heart-centered impact.

[See Profile](#)

Dr. Alexander Laszlo

As President of the Bertalanffy Center for the Study of Systems Science and Director of Research at the Laszlo Institute of New Paradigm Research, he advances holistic approaches to complex global challenges.

[See Profile](#)

Emanuel Kuntzelman

Entrepreneur, philosopher, and social visionary, Emanuel Kuntzelman is the founding force behind the Holomovement—a global initiative uniting science and spirit to catalyze collective purpose and transformative action.

[See Profile](#)

Dr. Anne Baring

Jungian analyst, author, and visionary scholar, Anne Baring is renowned for her work on the Divine Feminine and the evolution of human consciousness. Her seminal books, including *The Myth of the Goddess* and *The Dream of the Cosmos*, explore the integration of spiritual, mythological, and psychological traditions to foster a more balanced and compassionate world.

[See Profile](#)

Dr. David Gershon

Visionary social architect, author, and CEO of the Empowerment Institute, David Gershon is renowned for pioneering large-scale behavior change and community empowerment initiatives. His transformative projects, including the First Earth Run and the Cool City Challenge, have engaged millions globally, fostering sustainable living and collective action.

[See Profile](#)

Spotlighting a Selection of Our Newest Award Winners

Greg Bradden

Five-time New York Times best-selling author, scientist, international educator and renowned as a pioneer in the emerging paradigm based in science, social policy and human potential.

[See Profile](#)

Dame Julia Morton-Marr

Global peace educator and sustainability leader, Julia Morton-Marr empowers youth and educators through innovative curriculum that unites environmental stewardship, human rights, and global citizenship.

[See Profile](#)

Dr. Julie Krull

Award-winning author, speaker, and consciousness coach, Dr. Julie Krull is a leading voice in conscious evolution and whole-system transformation. As host of The Dr. Julie Show: All Things Connected and Co-Founder of Good of the Whole, she empowers individuals and organizations to co-create a thriving, interconnected future.

[See Profile](#)

Ben Bowler

Unity activist, spiritual entrepreneur, and Executive Director of UNITY EARTH, Ben Bowler leads global initiatives fostering interfaith harmony and collective purpose. As co-founder of Purpose Earth and creator of immersive programs like Monk for a Month, he bridges cultural divides to inspire a more unified and compassionate world

[See Profile](#)

Dr. Jude Currivan

Cosmologist, planetary healer, and futurist, Dr. Jude Currivan integrates cutting-edge science, consciousness research, and ancient wisdom to illuminate a unified vision of reality. As co-founder of WholeWorld-View and author of The Cosmic Hologram and The Story of Gaia, she empowers global transformation through unitive awareness and conscious evolution.

[See Profile](#)

Jennifer K. Hill

Entrepreneur, author, and consciousness coach, Jennifer K. Hill is a dynamic leader in the fields of human potential and organizational transformation. As co-founder of OptiMatch and host of the "Regarding Consciousness" podcast, she bridges science and spirituality to foster meaningful connections and purpose-driven leadership.

[See Profile](#)

Dr. David G. Newman

A distinguished lawyer, peacebuilder, and Rotarian whose lifelong commitment to justice, human rights, and reconciliation has shaped transformative initiatives across Canada and beyond.

[See Profile](#)

Gail Straub

Gail Straub is a visionary pioneer in empowerment and co-founder of the Empowerment Institute. A global leader in women's empowerment, she also co-founded IMAGINE to help women heal from violence, rebuild their lives, and uplift their communities.

🌟 Honoring Recent Award Recipients

We celebrate the recent awards received by the following individuals over the past few months whose contributions continue to inspire and uplift communities around the world — congratulations!

Maria Dolores

Ambassador for World Peace, author, and founder of The Human Contract Foundation, championing global leadership and a new social contract rooted in human rights, responsibility, and unity.

[See Profile](#)

Diane Longboat

Mohawk Elder, ceremonial leader, and spiritual activist bridging Indigenous wisdom with healing, education, and systemic transformation.

[Profile in progress.](#)

Estelle Lamoureux

Human rights educator, former high school principal, and founder of Ethics Bowl Canada, Estelle Lamoureux champions inclusive education and ethical dialogue through leadership roles with CCUNESCO and the Manitoba Association for Rights and Liberties.

[Profile in Progress.](#)

Diane Redsky

Indigenous advocate, executive director of Ma Mawi Wi Chi Itata Centre, and national leader in combating human trafficking and advancing Indigenous women's rights.

[Profile in progress.](#)

Brandi Dugal

Innovative educator, literacy advocate, and founder of The Fidget Game, Brandi Dugal is transforming global education through gamified, science-backed learning tools that empower all children to read with confidence

[See Profile](#)

Moshe Gersht

Spiritual teacher, bestselling author, and former musician, Moshe Gersht bridges ancient Torah wisdom with modern mindfulness, guiding others toward inner peace and higher consciousness.

[See Profile](#)

Diane L. Haworth

Heart-Centered Success Coach, author, and founder of the Be Love Principles, Diane L. Haworth blends spiritual wisdom with practical tools to help individuals live with greater love, clarity, and joy

[See Profile](#)

Dr. Ernest Thiessen

Engineer, mediator, and inventor of Smartsettle, Dr. Ernest Thiessen pioneers AI-powered negotiation systems that transform conflict resolution across sectors. [Profile in progress.](#)

Dr. Kawser Ahmed

Peace and conflict scholar, UN peacekeeping veteran, and Executive Director of CRRIC, advancing global resilience through research, education, and transformative dialogue.

[Profile in progress.](#)

Matt Foran

Founder & CEO of KnowMeQ, innovating AI-driven workforce solutions to bridge skills gaps and empower career mobility in the evolving job market.

[See Profile](#)

Mona Brookes

An influential American artist/educator who developed the Monart® drawing method of art instruction.

New Releases from Visioneer Authors

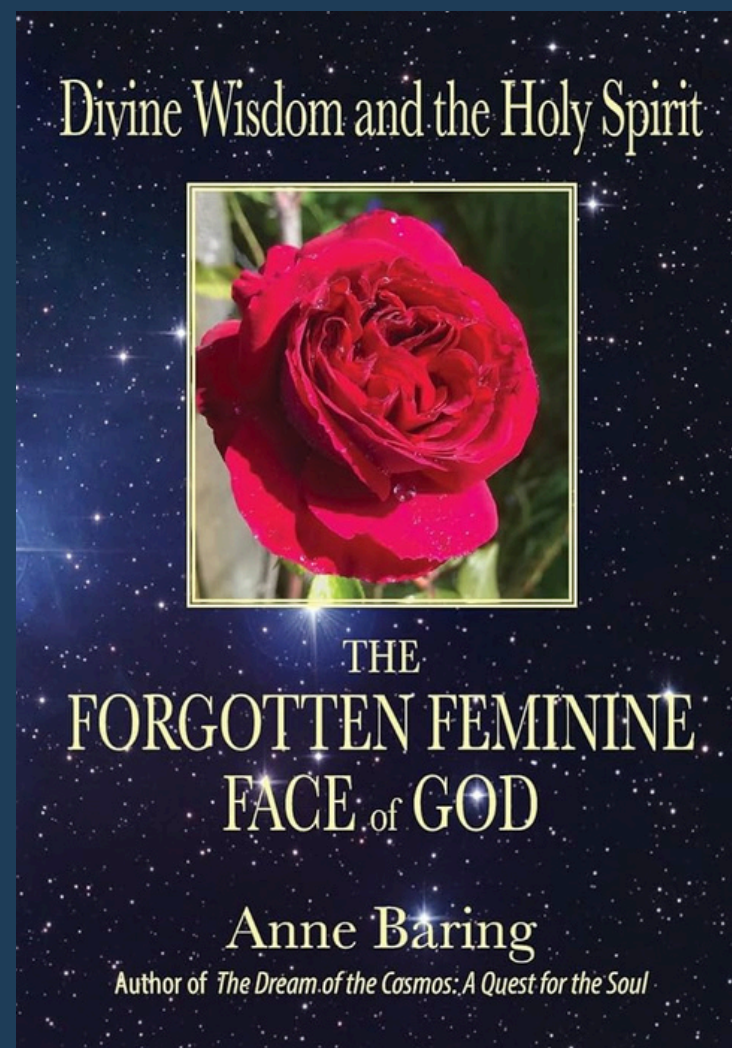

We are thrilled to announce the publication of two groundbreaking books by esteemed Visioneer Award Winners. These works offer profound insight, wisdom, and inspiration—and we encourage you to explore and share them widely.

🌹 *Divine Wisdom and the Holy Spirit: The Forgotten Feminine Face of God* by Anne Baring

This book is a celebration of Divine Wisdom and the Holy Spirit, the forgotten feminine face of God. In this interlude between the Age of Pisces and the Age of Aquarius, the long-lost image of the Divine Feminine is returning.

She, the Corner Stone that the builders rejected during the Age of Pisces, is initiating a crucial new phase in our evolution, urging us to discover a new ethic of responsibility towards the planet, bringing us a new vision of the sacredness and unity of life. Wisdom, justice, beauty, harmony, love and compassion and the impulse to help and to heal are the qualities that have traditionally been identified with the Divine Feminine, yet she is also the irresistible power that destroys old forms and brings new ones into being, the inspiration of the love-in-action that is needed to transform a culture that is radically out of touch with its soul.

🌍 *Home Inside the Globe: Embracing Our Human Family* By Gail Straub

A memoir taking you to far-flung places across the globe and the inner realms of the soul.

In a world run amuck with seemingly irreparable differences and conflicts, Gail Straub's memoir offers an antidote. As a seeker on pilgrimage across the Sahara with indigenous Tuaregs, trekking off the beaten trail high in the Himalayas, the intrepid Straub seeks out all that is different so that she can become whole. As an activist, Gail becomes immersed in Gorbachev-era Russia and Deng Xiaoping-era China. She empowers sex-workers in India and Syrian refugees in Jordan. Here out beyond man-made political borders, she finds a boundless realm where we connect as human beings transcending nationality, skin color, gender, socio-economic status, and religion. Home Inside the Globe is an invitation to awaken as individuals so that we can fully participate in creating a better world for all people.

Humanity's Golden Peace

Humanity's Golden Peace, written and presented by founders Dr. Geraldine Schwartz and Dr. Desmond Berghofer, presents the overarching Vision and Intention for the Visioneers International Network.

Humanity's Golden Peace is the safe harbour we need to deliver positive, creative solutions to the existential crises we face.

The overarching statement about the meaning of Golden Peace includes the absence of war and much more...

It includes creating a safe harbour where:

- Maternity hospitals are safe for mother and child.
- Schools from nurseries and kindergarten to grade 12 to universities are places where students feel safe to pursue learning and make friendships and where bullying of any kind is unacceptable.
- Workplaces are safe and free of discrimination.
- Justice, diversity, truth telling and following the rule of law are honoured.
- The disabled, the elderly and the poor are treated with respect and nurtured to contribute.
- Governments are chosen by a free and protected vote of the people.
- Human rights, including the rights of women, Indigenous people, and people of different beliefs, races and sexual orientations are respected.

Looking after the Earth, the air, the water, ourselves each other and ensuring that all living creatures are respected is the prime underlying requirements of peace everywhere.

The Stakes Have Never Been Higher

By Dr. Desmond Berghofer

The Visioneers Call to Action described above is issued at a time when the stakes have never been higher for the well-being of humanity and Earth. This in no way diminishes the hopefulness of the message, but rather underlines the urgency of its implementation. To understand the context in which action is to be taken is to increase the likelihood of its success.

With this in mind, let's review the situation now facing humanity.

At the end of the first quarter of the 21st century, we find ourselves living at the most perilous time in human history, not in terms of an impending cataclysmic event or major war, but in a quagmire of reinforcing interdependent global problems from which there appears to be no escape.

This is not a sudden development. It has been building over centuries, driven by a mindframe that sees the world and all of physical reality as a domain of separate entities in which human beings can exercise dominion by control and force. The result has been endless conflict between increasingly powerful human groupings, culminating in devastating wars between nation states, which reached its terrifying apex in two world wars in the 20th century and unleashed the threat of total annihilation through nuclear war in a devastating future.

At the same time, the mindframe of separateness has pitted humanity against the natural environment in which nation states and industry have competed for natural resources and laid waste to the physical landscape and built exploitative economies that are now cumulatively exceeding planetary boundaries for the continual operation of ecosystems on which all life depends.

The stark bleakness for the potential of biological life on the planet can not be overstated. This is entirely unprecedented in human history. No experience from the past has prepared humanity for the challenges now facing it.

That is the context in which we find ourselves.

Now, let's review the reasons to be hopeful.

Significantly, the science and technology that is driving the trajectory towards collapse can also be used to find a way out. However, this cannot happen while the operating mindframe of humanity is fixated on separation and competition.

As the danger has intensified in recent decades, pockets of enlightened thinking have emerged in the work of global thought leaders who see the danger and are leading initiatives to find solutions. But nothing has yet materialized to break the dominant mindset of competition and conflict, as clearly evidenced in the current global chaos fueled by trade wars.

But the Visioneers are focused on breaking this dominant mindset.

In the face of the challenges now confronting us, one question stands out in bold prominence:

How can humanity embrace a global mind change that steers the trajectory away from conflict and breakdown?

One thing seems clear. The solutions are not going to come from leaders of nation states who are too preoccupied in managing their relationships in the context of the existing paradigm. Ultimately, world leaders will need to enforce solutions, but they are unlikely to originate the solutions.

The greatest hope for humanity is that sufficient freedom and robustness of democratic institutions exist in the world for people to come together in new ways to learn from each other, to unleash their creative imagination and vision, and build on the positive values of their cultural and spiritual traditions to create the upshift, as envisaged by Ervin Laszlo, to find new ways to live together on planet Earth.

In the wisdom of Buckminster Fuller, we cannot change things by fighting existing reality: we must build a new model that makes the existing model obsolete.

It is a call for “We the people” to act to save ourselves.

This is the call of the Visioneers. The genius and leadership for change already exists.

The Visioneers Network is finding the global thought leaders, showcasing and celebrating their work, and creating the means through digital connection for people everywhere to come together, to learn new wisdom, and to find solutions that can be moved upwards to the levers of power.

The generations alive today are being challenged as never before to collaborate for life in a global civilization. This cannot be done with the old nationcentric thinking anchored in ideas of separation and destructive competition, but only with a new kind of cooperative leadership that is worldcentric and humancentric filled with belief in unity and oneness and fueled by the values of compassion, empathy, kindness and love.

A glorious future beyond our current imaginings lies in potential manifestation in which all people everywhere can flourish in joyful lives of positive, collaborative accomplishment.

There is no time to lose in bending every effort of will and creativity to the task of building that future.

That is the call of the Visioneers.

We ask that you come join us to participate in this magnificent endeavour.
